90% of the products we sell are made in Poland, which guarantees high quality and optimization of order fulfillment processes.

By designing and delivering multifunctional and safe devices, we promote outdoor fun, development and physical activity of all age groups. We also respond flexibly to the needs of our clients, providing solutions tailored to individual orders, both technologically and financially.

Our values

BOXLINE collection

Playground

Playgrounds are safe spaces where children develop key physical, social and emotional skills through play and integration.

At **NOLMO**, we take care of every detail of the playground, treating each investment with exceptional care, from design to installation. We believe that our playgrounds shape future generations.

Dive in the vibrant world of bustling metropolises, where design reflects the pulsating energy of the city, creating a unique collection full of inspiration and modern design.

Integration Sets

We understand that safety is paramount. Our Integration Sets adhere to stringent safety standards, offering a secure environment for children to play freely. Integration sets are tailored to ensure that children with disabilities can enjoy the playground alongside their peers. From accessible ramps to sensory elements, we prioritize inclusivity.

We believe that a playground should be as visually appealing as it is functional. Our sets are designed to enhance the overall aesthetics of your community. With years of experience, we offer expert guidance and support throughout your project, ensuring your playground is a success.

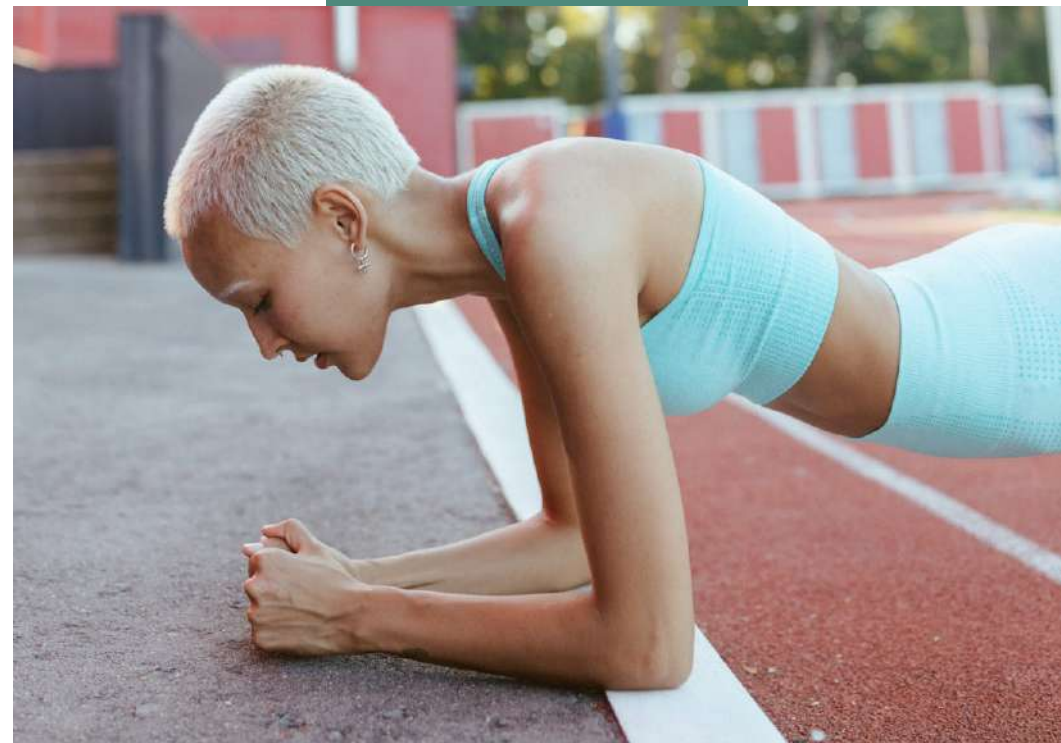

Sport

Outdoor gyms are solutions that transform urban spaces. They are an excellent opportunity to relax, get rid of stress and improve your physical condition. They become a place for meetings, family integration and training after a long day of work.

Urban gyms enliven villages, communes and cities, and can be adapted to various locations, including parks, playgrounds, housing estates, as well as recreational and sports centers.

Street furniture

Choosing small architecture is an opportunity to completely transform urban space through a variety of styles, colors and materials. Well-chosen street furniture attracts people outdoors and increases the attractiveness of public recreation areas.

The art of creating a common space

At **NOLMO** we are not limited to the standard offer of devices. Our **Nolmo Creative Studio** is a team of specialists ready to implement non-standard projects.

Thanks to our **experience**, modern **design** and innovative **materials** and **technologies**, we create unique solutions tailored to the individual needs of the investor and the environment.

Our mission is to create spaces that inspire, surprise, engage, teach through fun and evoke positive emotions, encouraging people to spend time actively.
